- **Analytical Abilities:** Data Cleaning, Exploratory Data Analysis (EDA), ETL.
- **Soft Skills:** Team Collaboration, Time Management, Communication.

Projects

Superstore Sales Performance Dashboard | Power BI

- Analyzed Superstore dataset to evaluate sales distribution and product-level performance.
- Created KPIs using DAX , monthly trends and sales profit and percentage breakdowns.
- Applied filters and parameters (year, sale type, date range) to enable dynamic analysis.
- Identified top-performing products and profit trends to generate actionable business insights

Investment Behaviour and Demographics Dashboard | Power BI

- Studied how men and women invest in equity, mutual funds, and bonds.
- Created dashboards combining age, gender, investment types, and monitoring habits.
- Added filters to show reasons for mutual fund investment by time and frequency.
- Highlighted key investor preferences and savings goals for better insights.

Customer Churn Prediction | python

- Analyzed 10,000-record customer dataset with 14 attributes to study churn behavior.
- Performed data cleaning and exploratory analysis to uncover churn patterns.
- Visualized key factors such as age, balance, geography, and gender impacting churn.
